

00055 Health-Promoting Environment

The students will be able to

- understand and identify factors affecting health and the environment
- assume responsibility for developing the health and safety of the environment
- to support the health of an individual, family and community

Content:

Part 2: Maternity care/ Reproductive health 3 ECTS

- global challenges to reproductive health
- family nursing / parenthood
- promoting the health of the woman and her family during the pregnancy and postpartum

Part 4: Community nursing 3 ECTS

- environment and community as a concept
- national and international health care action plans promoting well-being and health of the population (e.g. Health 2015 public health programme)
- environmental health effects and their prevention
- community profile and analysis

Description:

The competence gained in the study unit relates to managing health promotion in various human communities and environments. It is based on an environment-, community-focused and family-based operating models. The focus is on influencing the environment's physical, social and symbolic elements as well as promoting the well-being and health of the population.

Assessment:

Community profile –report, oral presentations.
